

Zachary Hadjah

>>> SOFTWARE ENGINEER

PERSONAL SUMMARY

I create Full-Stack web applications utilizing .net technology. My web applications implement Authentication, Authorization, Database Management, Clean User Interfaces, and cutting edge backend programming.

<https://github.com/zhadjah9559>

SKILLS

- Front end development using HTML, CSHTML, CSS, Bootstrap4, JQuery, AJAX
- Object-Oriented Programming in C#, C, C++, Java
- Dom Manipulation via Javascript
- Implementing the MVC Design Pattern
- Authenticate User accounts via Microsoft's Identity Framework
- Database Management via PostgreSQL and Microsoft Entity Framework

EXPERIENCE

Software Engineer

[Coder Foundry](#) | [December 2020 - Present](#)

- Create Full Stack business applications utilizing .net technologies

IT/Help Desk

[Westfield State University](#) | [Sept 2016 - Dec 2019](#)

- Develop animations using Adobe Edge software. Animations allowed teachers to present visuals to their students online, helping them better grasp complex topics.
- Provide excellent customer service by helping students and other faculty members navigate technical problems.
- Handle Standard Data Entry assignments

Website Admin

- Created an Ecommerce Website using basic HTML and CSS
- Sold Vermicompost to residents of the Greater Boston Area
- <http://middlesexworms.com/>

ACADEMIC BACKGROUND

Westfield State University

[BS Computer Science](#) | [Sept 2016 - Dec 2020](#)

- Data Structures and Algorithms
- SOLID Principles
- Object-oriented Programming
- Structured Programming
- Theory of Computation
- Low-level programming
- Operating Systems
